Rafael de Lara

Fintech Software Engineer at @Clinicorp Solutions
Jaraguá do Sul, Santa Catarina, Brazil

Summary

Studying Software Engineering at the University of Católica SC, with direct exposure to various areas of Programming such as JavaScript (including React and NodeJS), C++, Python (Flask and Django) and Java (Spring Boot).

In addition to my university studies, I pursue Web Developer courses on platforms like Coursera and Udemy, which allows me to be highly adaptable in learning languages relevant to applications and websites used in the industry.

Experience

Clinicorp Solutions
Software Engineer - Fintech
June 2024 - Present (1 year 5 months)
Jaraguá do Sul, Santa Catarina, Brasil

As an Software Development, my work is related to:

- Develop systems and applications according to specified requirements and stipulated deadlines, using the necessary tools to meet project needs;
- Design and execute unit tests based on requirement gathering, aiming to ensure the quality of delivered developments.

Associação dos Municípios do Vale do Itapocu
Information Technology Intern
July 2023 - June 2024 (1 year)
Jaraguá do Sul, Santa Catarina, Brasil

As an IT Support Intern, I contributed to:

- Development of the project "Virtual Reality for Engineering and Architecture Project Presentations", as part of an Innovative Company initiative, earning first place in the IEL (Evaldo Lodi's Institute) NATIONAL competition;
- Started creating automations using AutoCAD's programming language, making the work of engineers and architects easier.

Education

Católica de Santa Catarina - Centro Universitário

Graduation, Software Engineering · (February 2023 - December 2026)
